

Minsara Nanban

Minsara Nanban is a new initiative by TANGEDCO in association with Ministry of Power, Govt. of India under the Urja Mitra Scheme. This customer friendly initiative has been launched today by the Hon'ble Minister for Electricity, Exercise and Prohibition.

The main objective of the scheme is to share information about scheduled / unscheduled electrical power outages in rural and urban areas directly to consumer through SMS to their mobile phones.

So far, details for 1.60 crores of TANGEDCO consumers have been uploaded. By utilizing the Rural Electrification Corporation (REC) server, a message will be sent to all the registered mobile numbers in an area about the planned shutdown and feeder level unplanned outage in that area.
